Education

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (CSE)	Sagi Ramakrishnam Raju Engineering College	7.75(Current)	2022-Present
Senior Secondary	AP State Board	77.5%	2020-2022
Secondary	AP State Board	97.1%	2020

Projects

- Healthcare E-commerce Platform with Telemedicine Integration** Apr-2025
Developed a full-stack e-commerce web app medical supplies with integrated telemedicine. Implemented role-based auth, real-time bookings, payments, and admin dashboard with analytics.Enabled seamless patient–doctor interaction and streamlined order management for admins. Integrated real-time notifications and improved overall user experience through intuitive UI/UX enhancements.
– **Tools & technologies used:** HTML,CSS,JavaScript, JPA/Hibernate, JWT Authentication, Responsive Design
- Real-Time Credit Card Fraud Detection System Using Ensemble Machine Learning** Aug-2024
Developed a real-time credit card fraud detection system using Random Forest and Autoencoder models.Achieved 96.1 precision and 94.5 recall on imbalanced data. Handled 0.17% fraud rate using SMOTE for class balancing; improved minority detection significantly. Built an interactive real-time monitoring dashboard using Streamlit to visualize fraud detection results instantly.Integrated Plotly charts for transaction insights and anomaly highlighting with sub-second response time.
– **Tools & technologies used:**Python, Streamlit, TensorFlow, Scikit-learn, Random Forest,Autoencoder,SMOTE, Plotly

Hands-On-Experience

- Fullstack development-Java Intern Blackbucks** Jun 2024 - Aug 2024
2 Months (Remote)
– Worked on a Full Stack Java project focused on smart pesticide detection in agriculture using image processing.Implemented
– Spring Boot backend and responsive UI for farmers to upload crop receive pest analysis early detection crop-damage
- Machine Learning Workshop** Nov 25 - Nov 26 2023
2 Days
– Participated in an intensive hands-on workshop focused on the fundamentals and key concepts of Machine Learning.
– Successfully implemented a Heart Disease Prediction Model using classification algorithms such as Logistic Regression, Decision Trees, and K-Nearest Neighbors, achieving an accuracy of over 85 percent on test data.
- LLM & ChatBot Workshop** Sept 30, 2024
1 days
– Built finetuned LLM powered chatbots using OpenAI and Hugging Face APIs,NLP solutions to customer interaction
– API backends and performed prompt engineering to optimize response accuracy.

Key Courses Taken

- Data Structure,Algorithms, Machine Learning, Programming in Java, Python, Web Development, and UI/UX design.

Technical Skills

- Programming:** Java, Python
- Tools :**Visual studio, Android Studio, Google Colab, Github,
- DesignTechnologies:** Adobe Xd, Figma, Canva,Adobe photoshop, Premierpro, Blender,
- Academic Coursework:** Data Structures, Machine Learning (ML), Deep Learning (DL), Natural Language Process (NLP), Reinforcement Learning (RL)

Achievements

- SIH Hackathon** Selected to final round of evaluation in 24hrs hackathon in SRKR Engineering College (Smart India Hackathon,Sept 2024) on the domain of Web development (NextStep - Interactive Tech Career Hub).
- Leetcode & HackerRank Recognition** Solved 230+ problems on LeetCode and Earned 5-star badges in Java and Python, demonstrating strong problem-solving skills and coding proficiency.

Certifications

- Learn UI UX Design Adobe XD : Learn User Experience Design - Udemy
- Certifications of GOOGLE AI-ML VIRTUAL INTERNSHIP& ANDROID DEVELOPER - EDUSKILLS
- Python Basics for Data Science&Visualizing by IBM - APSCHE edX Global Learning Network (GLN)
- AI-Transformative Learning with TechSaksham joint CSR initiative of Microsoft&SAP, implemented by Edunet - Aicte
- NPTEL Certification on Programming with java
